

1. Install webbing roller.

Webbing rollers are installed to the mechanism end on both sides of the pool.

- 1.1. Set webbing roller bracket so that it is square with the guide.
- 1.2. Line up groove in webbing roller with guide and webbing.
GROOVE MUST BE IN EXACT ALIGNMENT OR COVER WILL NOT OPERATE PROPERLY.
- 1.3. The edge of the roller bracket sits approximately 1 $\frac{3}{4}$ " away from the outside edge of the track.
- 1.4. Hold roller in position and mark hole locations with a pencil or $\frac{1}{4}$ " masonry drill.
- 1.5. Move roller and drill marked hole locations with $\frac{1}{4}$ " masonry drill 2" deep.
- 1.6. Blow dust out of holes.
- 1.7. Insert red plastic anchors into drilled holes and tap into place.
- 1.8. Place webbing roller back in position and secure with #12 x 1 $\frac{3}{4}$ " screws.
